To Whom It May Concern:

I would like to recommend Mr. Jeremy Coxon of **SunWind Power Systems Inc.** for approval of NABCEP certification. I have been using Mr. Coxon's services since early 2007 and find him to be a highly qualified, professional and experienced solar installer.

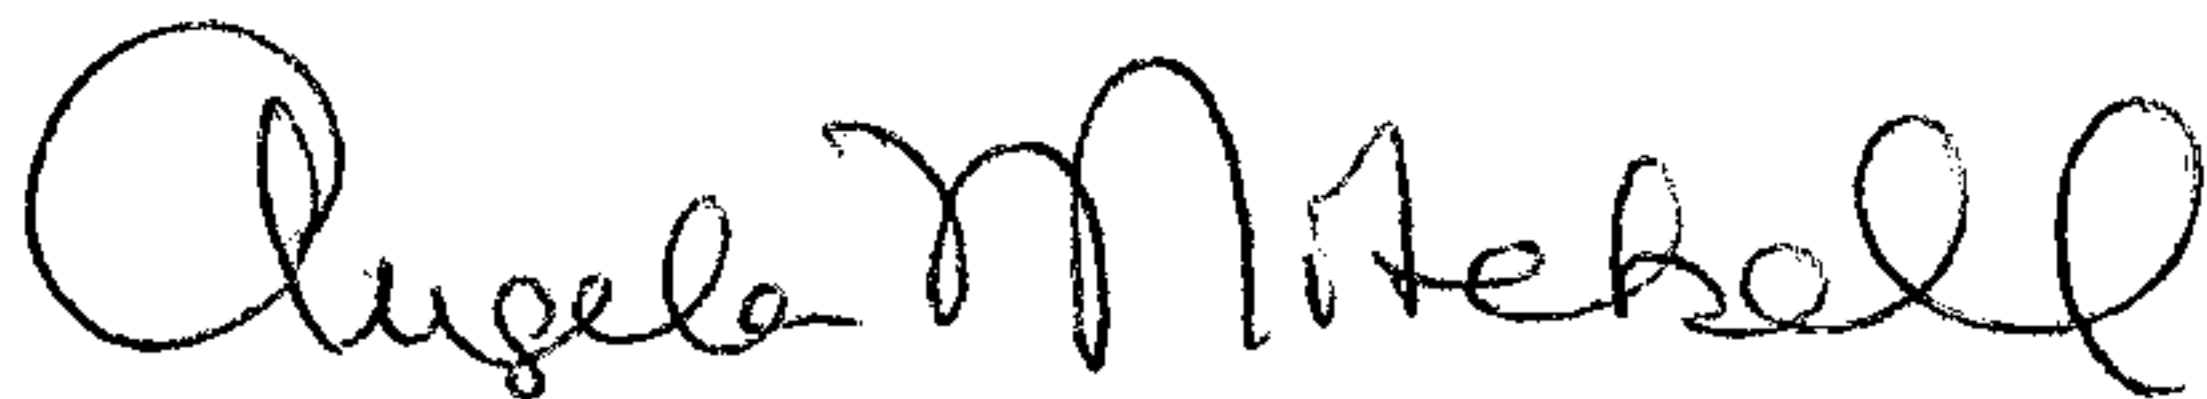

He installed a closed loop 80 gallon solar hot water system for my family in May 2007 after first performing an energy audit and recommending energy savings improvements for my home. This system has been functioning wonderfully since its installation with only a few minor adjustments that needed to be made which were done quickly and efficiently at my request.

In October 2007 Mr. Coxon installed a 4.59 kW Grid Tied Photovoltaic System which was shown during the Capital City Solar Tour on October 9th. This installation came after much effort on Mr. Coxon's part to convince our local utility company (Frankfort Plant Board) to allow net metering, which had not been previously allowed. Mr. Coxon came to Frankfort several times to meet with the utility company and explain how the system would work, and additionally to present a detailed explanation to the FPB Board members to convince them to vote to approve this type of connection. The inspectors who approved his work said that they had never seen anything done so comprehensively, neat, and by-the-book and that any future installations would have to measure up to this one before they would be approved in Frankfort. Without Mr. Coxon's persistence and help I most likely would not have my PV system today.

I hope that you will allow certification for Mr. Coxon as he truly is a highly skilled and dedicated renewable energy professional with a heart for helping to save this earth. I feel very blessed to have met him, and credit him for taking me from 800-1200 kW per month user of coal-fired electricity to feeding the utility company an excess of green energy of 178 kW hours so far this month.

If you would like to discuss any of Mr. Coxon's installations in more detail you may contact me at your convenience.

Sincerely,

Angela Mitchell
